## Chamois Butter

Chamois cream is a product that has long been in use in Europe and the USA, but not so popular here in Oz. I can remember the number of questions on Australian bicycle forums after Hell on Wheels came out and Erik Zabel was shown having it rubbed into his knicks. This is changing and chamois cream is one of the hot products on the Aussie market. This particular version is a glycerol based cream and is available in a tube or tub. The European version has a 'traditional European cooling formula'. It's nice and thick to apply and doesn't sting if you already have chaffing.

*Eurostyle tub: \$35.00*

*Tube: \$28.00*
